

The Element Standing desk perfectly combines design with functionality to transform your workspace. With the four-position memory keypad you can easily adjust the height of the desk and experience a smooth transition from sitting to standing. Enjoy a full selection of various tabletop options to combine with our high-quality frames so you can build your own ideal sit-stand workstation!

The sleek, convenient design of the Element desk's built-in remote allows you to seamlessly change your desk's height with the click of a button! Take advantage of this remote's memory position feature, allowing you to set up to four preset heights.
