

DOLLAR

Dollar is usable both singularly and as modules where the single elements are joined together creating never ending combinations. The modular system impresses for its organic shape that has unlimited possibilities of realization.

A simple collection of ottomans and a back that can be used in concert to create long and curving seating arrangements. Perfect to delineate space and create intimate conversation areas. The simplicity of the shape and complexity of the form highlight the best of minimalism. Use the back as an arm or a back. Mix finishes colors and textures to add depth to the design.
